

ESET Mobile Antivirus

For Windows Mobile

Fast and effective proactive protection against known and emerging mobile threats.

Antivirus - Antispyware

ESET Mobile Antivirus

Smartphones and PocketPCs are used for communication, entertainment and services. Not only are these mobile devices indispensable, they also contain an increasing amount of private information.

This trend is attracting the attention of financially motivated cybercriminals. Analysts agree that mobile devices will become increasingly targeted for attack, putting hundreds of millions of devices at risk to these emerging and unknown threats.

ESET Mobile Antivirus delivers proactive and comprehensive protection from viruses, spyware, adware, trojans, worms, rootkits, and other potentially unwanted software. As mobile threats evolve, ESET Mobile Antivirus will keep your smartphones and Pocket PCs safe — even between signature updates. Its fast engine keeps your inbox uncluttered by filtering SMS spam from unknown and unwanted senders.

ESET Mobile Antivirus has low CPU, memory requirements and compact updates that minimize data bandwidth usage. It protects email attachments and other files as they are transferred or accessed, without impacting performance.
